REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: claims 1 and 15 are patentable over the prior art patents and printed publications because of the specific provision of the spread spectrum clock generator, which is coupled to the printer control unit, which in turn includes a data formatting unit and a clock circuit and is coupled to the array of light emitting diodes, wherein the spread spectrum clock generator modulates the clock circuit to generate a clock output signal having reduced amplitude electromagnetic interference spectral components such that electromagnetic interference emissions from the array of the light emitting diodes are reduced. The combined limitations as claimed are not taught by the art of record alone or in combination.

Claim 8 is patentable over the prior art patents and printed publications because of the specific provision of the spread spectrum clock generator, which is coupled to the array of the light emitting diodes of the LED bar system to generate a clock output signal having reduced amplitude electromagnetic interference spectral components such that electromagnetic interference emissions from the array of the light emitting diodes are reduced, and wherein the array of the light emitting diodes is coupled to a control unit having a data formatting unit and a clock circuit to enable properly timed activation of individual light emitting diodes of the array. The combined limitations as claimed are not taught by the art of record alone or in combination.

Art Unit: 2861

Claims 2-7, 9-14 and 16-20 are allowed because they are directly or indirectly dependent from claims 1, 8 and 15 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
